InfoComm 08 Fast Facts:

InfoComm is the leading business-to-business marketplace for display, projection, audio, conferencing, lighting and staging, digital signage, Internet streaming and networked presentation and communications systems.

[Registration is Open!](#)

Conference: June 14-20, 2008; will include 350+ courses, basic through advanced levels, covering audio, video, projection, digital signage, design, certification, conferencing, AV-IT integration, and much more. Includes Institute for Professional Development classes (June 14-16); intensive one-day sessions; and 2-4 hour courses.

Exhibition: June 18-20, 2008, North and Central Halls, Las Vegas Convention Center

NSCA Expo: Incorporated as part of the InfoComm Exhibit Floor, June 18-20; including an NSCA-sponsored pavilion; an NSCA education track will also be offered. Registration for NSCA courses opened in early 2008.

NXTcomm: The co-owned tradeshow by the Telecommunications Industry Association (TIA) and the United States Telecom Association (USTelecom) targeting premier information and communications technology suppliers, taking place June 16-19. InfoComm visitors may access the NXTcomm show floor free, and vice-versa.

InfoComm Projection Shoot-Out® Software Volume 2.0

With its high performance demonstration and evaluation functionality, the latest software disc set is designed to enhance the sale of video displays. Purchasers are able to create their own comparisons of display products using a diverse range of royalty-free photos, graphics, test patterns and video segments incorporated into the software.

The software is available for sale through [Extron Electronics](#).
