

Tech Consultant Expands In Challenging Economy

SOURCE: [The Sextant Group](#) · RELEASED: 4/17/2009

WASHINGTON -- The Sextant Group, Inc., an internationally-recognized, independent technology consulting and design firm announces plans to open a new office inside the beltway in Washington DC.

The new branch offers improved access and better service for clients in Virginia, Maryland and surrounding areas from one of the nation's top technology consulting firms. Recognized by architects and clients internationally for the integration of technology into the built environment, The Sextant Group specializes in Audiovisual and Information Technologies, Building Security, Acoustics Consulting, and Strategic Technology Planning.

"Despite concerns about the economy, we're very bullish on this expansion," says Mark Valenti, President and CEO. "Even from the very early days of the company in 1995, there has been strong need for our services in the mid-Atlantic."

The Sextant Group has completed or is currently working on academic, research and government projects valued at nearly one half billion dollars in just the District and the two adjoining states. These include George Mason University Academic VI/Research II facility, James Madison University College of Integrated Science and Technology, and Logistics University for the Department of the Defense.

The firm is also currently working on multiple projects for University of Mary Washington, including the Dahlgren Research Center and Information & Technology Convergence Center, and a series of facilities for the University of Virginia, including the new Medical Education Building, Information Technology Engineering Building and Life Science Building.

The new office will be located at 100 I-Street SE, Washington DC, 20003. Staffing announcement for the new office is expected to be made shortly.

The Sextant Group also operates offices in Atlanta GA, Cincinnati OH, Phoenix AZ, and Pittsburgh PA. Specializations include education, medical, corporate, government, institutional, performing arts, broadcast, and sports & recreation projects. Additional information is available at www.TheSextantGroup.com.

The Sextant Group is an award-winning full service digital technology consulting firm specializing in design, engineering and specification of architectural and environmental acoustics, audiovisual systems, IT, telecommunications, security, and structured cabling technologies.

Clients include education, medical, corporate, government, institutional, performing arts, broadcast, and sports & recreation, on over a 1000 projects for more than 500 owners in 42 states and 11 countries.
