

InfoComm-Recognized AV Technologist Certificate Program

InfoComm is pleased to introduce a recognition program for achieving a basic level of audiovisual technical knowledge.

"For me, the InfoComm-Recognized AV Technologist Certificate was a quick and straightforward way to indicate to clients and potential employers that I had a baseline understanding of AV technology. Though I have been in the field for a couple years, my training was not formal and this designation is a springboard for the CTS certification."

~ Lily Rea, InfoComm-Recognized AV Technologist, Technical Manager, The George Washington University

This certificate program:

- Provides a common technical vocabulary for audiovisual technologies
- Recognizes achievement for individuals and their clients
- Provides a bridge to InfoComm's ANSI-accredited Certification program

Quick Facts

This is a two-part program:

- **Course Prep**
Essentials of AV Technology — [GEN102 Online](#), [GEN109 Virtual Classroom](#), [GEN111 Classroom](#)
