

# Audiovisual Best Practices: The Design and Integration Process for the AV and Construction Industry

This industry-encompassing publication presents an overview of the industry, explores the inner workings of AV projects with start-to-finish process descriptions, and concludes with an assessment of what the future holds for the industry.

**Audiovisual Best Practices** addresses the AV process questions of:

- architects
- building and construction trade personnel
- consultants
- contractors
- developers
- engineers
- facility owners
- project managers
- AV professionals

**Topics covered include:**

Message from Randal A. Lemke, Ph.D., InfoComm International Executive Director	Chapter 1: Understanding the Project Team
Acknowledgments	Chapter 2: Understanding the Process
Preface	Chapter 3: Selecting and Contracting the Project Team
Introduction	Chapter 4: The Program Phase
Overview of the Design and Construction Process	Chapter 5: The Design Phase
	Chapter 6: The Construction Phase
	Chapter 7: System Commissioning and Training

Appendices provide helpful sample contract forms (e.g., software license agreement) and checklists (e.g., standard AIA project forms and templates, questions to ask during the program and construction phases of AV projects), as well as a sample user guide, sample tech manual and AV glossary.

## About the Contributors

Creating a book of this nature required a first-of-its-kind industry collaborative effort. Professionals from every aspect of the industry (in many cases, those who would be competitors outside of the conference room) sat together over a two-day period and planned this remarkable volume. Integrators, designers and end users — typically coming to the project from differing perspectives — made a commitment that transcended their usual business interests. They joined forces, putting the best interest of the AV industry first. This book is the result of that effort.
